

# VENTURA TOWNEHOUSE

CALIFORNIA'S CROWN JEWEL IN RETIREMENT LIVING

July 23, 2020

RE: COVID-19 update

Dear Residents, Families and Employees,

On behalf of the Townehouse, we want to extend our continued appreciation and gratitude to all our residents, family members and employees. Everyone is following mask, distancing and had sanitizing protocol, and working diligently with the same goal in mind; to remain healthy by continuing to take the necessary precautions for covid-19.

At the direction of the Ventura County Department of Public Health, we conducted retesting today, July 23<sup>rd</sup> of our residents and employees, as part of our continuing effort to monitor and maintain a Covid free community. Test results should be available next week which we look forward to sharing with you.

Since our last memo update on July 1, we had one employee test positive (contracted from outside the community) and is isolating at home. No residents tested positive since, for which we enthusiastically applaud and congratulate all of you. After approval from Public Health to conclude overall testing, we will begin surveillance testing of employees every two weeks per new regulatory assisted living guidelines.

We will continue to check resident and employee temperatures and health daily. As always, kindly reach out if you need anything. We are here to serve you.

Warmly,

Evan Granucci  
Executive Director
